

Disinfection portfolio with Memosens 2.0

Continuous and precise measured
values for safe and clean water

Benefits:

- Continuous and precise values:
Monitor and react in real time
(without the longer time intervals
associated with colorimetric
measurements)
- Easy maintenance:
Large data storage thanks to
Memosens 2.0 allows predictive
maintenance
- High plant availability:
Optimized polarization time leads
to quick commissioning
- Reduced operating costs:
No reagents needed
